SUMMARY

Full Stack Developer with a strong foundation in user-centered design. Passionate about creating intuitive digital solutions that combine robust backend architecture with seamless frontend experiences while continuously expanding technical knowledge.

WORK EXPERIENCE *(Full Work Experience on LinkedIn)*

Ottawa Area Isd Holland, MI

October 2024 - Present

Software Developer Intern

- Developed and enhanced comprehensive reporting features for MiCoachCompass, a statewide educational platform, implementing data visualization with chart views and multi-format export capabilities (PDF, CSV, IMG).
- Implemented role-switching functionality for users to transition between different roles using cookie-based state management.
- Built full-stack features using C#, SQL Server, and React with Next.js, following TDD practices including backend C#, Jest, and Cypress E2E testing.
- Transformed wireframes into production-ready features, maintaining high standards of code quality and user experience

Tigerlily Ferndale, MI

April 2023 - January 2024

Bartender/Server

- Utilized Toast POS System and cash register for transactions.
- Adapted to fast-paced environments, multitasked to ensure guest satisfaction.

PROJECTS

Chromatica | [Github](#) | *Angular, Ionic, PostgreSQL, Figma, Tailwind CSS*

- Collaborated on a mobile application that leverages machine learning to generate personalized music playlists based on users' moods, activities, and musical preferences through Spotify's API.
- Architected and implemented a recommendation algorithm that analyzes user listening patterns and combines AI-generated audio features with Spotify's API to create highly personalized playlist suggestions.
- Created comprehensive UI/UX designs from lo-fi wireframes to hi-fi prototypes in Figma, establishing a cohesive visual language and user flow

Drisca | In Development | *React Native, Supabase, Expo*

- Developing a social platform that encourages personal growth through user-generated challenges, implemented OAuth authentication and user management through Supabase.
- Designed and implemented comprehensive sign-up flow with wireframes and user authentication, laying the foundation for scalable user experience and account management.
- Implementing CI/CD pipeline using GitHub Actions and establishing testing infrastructure to ensure code quality and deployment reliability.

TECHNICAL SKILLS

- | | | |
|-------------------------|--------------|---------------------|
| • C# | • HTML/CSS | • TDD |
| • JavaScript/TypeScript | • .NET | • OOP |
| • Angular | • SQL Server | • REST APIs |
| • React | • Git/Github | • Agile Development |

EDUCATION

C# .Net Full Stack Development

Figma UX UI Design Essentials

Grand Circus | July 2024

Udemy | June 2023
